

Aptean Food & Beverage PLM, *Lascom Edition*

Time Saving Benefits of an Integrated Formulation Solution

An industry-specific tool that streamlines formulation workflows, manages specifications lifecycle and aids with regulatory compliance in one centralized repository.

70%

Streamline New Product Development

- › Formulate new recipes from existing recipes
- › Utilize intermediates to develop prototypes
- › Control the impacts of a change in recipe on a whole range of products

90%

Optimize R&D

- › Follow and optimize detailed aspects of a formula from a single place: recipe, nutrition, costs, allergens, percentage of ingredients
- › Identify accurate nutritional value contributions of each raw material
- › Access USDA and CIQUAL databases, as well as data entered by your suppliers to create and easily adapt your products

70%

Expedite Compliance Checks

- › Monitor requirements like nutrition, claims, ingredients and allergens
- › Automatically calculate nutritional value tables, ingredient statement and allergens to generate accurate product labels
- › Automate calculation of the Quantitative Ingredient Declaration based on regulation rules

Aptean PLM is a web-based solution, ready to use out-of-the-box with SaaS deployment. Allowing you to easily standardize new product development with the flexibility to tailor and scale the solution to meet your or your client's needs.
