What's New

This document provides information on the changes and new features introduced in this release.

 **Note:** The following APS enhancements, such as AP Service Integration, Form Printer Setup in User Defaults, and enhanced Business rules, have been implemented in the 11.2 edition and are new additions to the 11.0 edition.

System Manager | AP Service Integration

A new service integration function has been added to enable the setup of Apteian Cloud Print Service at the company level.

System Manager | Business Rules

New Business Rules have been enabled to support Cloud Print and Form Printer Mode Setup as part of Apteian Cloud Print Service.

System Manager | User Defaults

A new set of user defaults for Apteian Cloud Print has been added, which takes precedence over the SM AP Integration Settings.

System Manager | Form Printers

Form Printers can be configured to utilize the Apteian Cloud Print Service and choose the Form Print Setup Mode (Workstation, User, or Both).

System Manager | Other APS Improvements

Apteian Cloud Print Service now enables printing of Interactive Views, Reports, Labels, and other components that support printing. The integration of Apteian Cloud Print has undergone extensive validation and performance improvements to enhance its functionality and overall performance.

Other | Hardware/Software Guidelines

Apteian Traverse is compatible with Windows Server 2022 and Microsoft SQL Server 2022.

Updates for Additional Applications

The following external applications have been updated to Build 23198 and each requires a minimum Traverse Build of 23198. If you are using any of these applications, it is recommended to update to the latest version.
