## Connection to warehouse management systems

With the support of agilesTrade you can map your warehouse data seamlessly. With the help of the integrated interfaces, agilesTrade can easily be connected to your external warehouse management system, such as PL-Store or InnoLog and your online shop.

## Financial Accounting

Keep track of your figures, liquidity and key performance indicators at all times. Keep an eye on your different credit limits (e. g. internal limits or from insurance companies and banks) for the entire company.

## Business Intelligence & Reporting

Gain deep insights into all areas of your organization at the touch of a button. Simple, clear and fast evaluations – on any device and at any time.

## Order Processing (Sales)

Easily and quickly enter your orders by using templates for different business transactions (e. g. domestic, EU or third country) and keep your delivery promises with the help of the date calculation.

## Order processing (Purchasing)

Quickly and easily enter your purchase orders as well as all purchase-relevant purchase order data (e. g. vendor, INCO terms). Assign your order to the appropriate container, and have the system calculate the delivery date directly.

## Calculation

No more time-consuming Excel calculations! With agilesTrade you will have a consistent calculation in the system. The purchase costs defined by you are taken into account. In the end you get an exact statement about whether you have calculated your actual purchase price (cost price) correctly in advance to calculate the optimal sales price.

## Packaging Units

agilesTrade manages the different sizes, units and dimensions of your packaging units, so that e. g. the weight of a pallet can be automatically calculated and taken into account when calculating the volume at the time of truck loading.

## Drop Shipment

Take advantage of the complete volume of your ordered container! Manage your third-party transactions with the help of a control panel and combine several third-party orders into one purchase order if necessary.

## Also included in the agilesTrade standard:

- EDI
- GTIN/EAN
- Intrastat
- Royalty Statement
- Condition Management
- Contract Management
